

**Name** : SHALIMAR WHEAT 1 (SKW196)  
**Notification No** : 1177(E) Dt. 25-08-2015  
**(National Release)**

Parentage	:	BSP-9321
Breeding Methodology adopted	:	Selection
Maturity	:	Medium
Grain Type	:	Ovoid, Semi hard, deep amber colour,
Biotic Stress	:	Resistant to Stripe rust
Abiotic Stress	:	Tolerance to Moisture Stress
Recommended regions	:	Northern Hill Zone
Areas of adoption	:	Plain area of valley upto 1700 m amsl
Special attributes	:	100 seed weight above 44-46 gm
Average yield	:	28 QtlsHa <sup>-1</sup>
Seed Rate	:	80 KgHa <sup>-1</sup>
Recommended Fertilizer Dosage	:	N :P:K 60 : 40 :20 kg ha-1
Precautions to be followed	:	Timely sowing, Restricted irrigation
