

Name : Shalimar Masoor-3

Year of Release : 2017

Parentage	:	KLS-221
Breeding Methodology adopted	:	Pure line selection
Maturity	:	202-204 days
Grain Type	:	Globose
Biotic Stress	:	Moderate resistant to wilt rust & resistant to white grub
Abiotic Stress	:	Tolerant to cold
Recommended regions	:	NW Himalayan region
Areas of adoption	:	Plains and hills of valley at altitude of 1850 m amsl.
Special attributes	:	Good cooking quality & Protein content 25%.
Average yield	:	13-14 Q/ha
Seed Rate	:	40 -50(50kg/ha under late sown)
Recommended Fertilizer Dosage	:	N:P:K @ 30:60:40
Precautions to be followed	:	For higher yield of seed crop, adequate plant population, good soil moisture and weed free crop is essential
Principal Breeder	:	Dr. S.A.Dar
Level of Adoption	:	5%
