

Name : Shalimar Masoor-2
 Notification No. : 268(E) dated: 28-01-15

Parentage	: EC-3109
Breeding Methodology adopted	: Pure line selection
Maturity	: 199-203 days
Grain Type	: Discoid
Biotic Stress	: Moderate resistant to wilt, rust & resistant white grub
Abiotic Stress	: Tolerant to cold
Recommended regions	: NW Himalayan region
Areas of adoption	: Plains and hills of valley at altitude of 1850 m amsl.
Special attributes	: Good cooking quality & Protein content 23.03%.
Average yield	: 12-13 Q/ha
Seed Rate	: 40 -50(50kg/ha under late sown)
Recommended Fertilizer Dosage	: N:P:K@45:60:40
Precautions to be followed	: For higher yield of seed crop, adequate plant population, good soil moisture and weed free crop is essential.
Principal Breeder	: Dr. S.A.Dar
Level of Adoption	: 12%
