

Name : Shalimar Chickpea-1 (Kabuli Chana)
Year of Release : 2014

Parentage	:	T-44311
Breeding Methodology adopted	:	Pure line selection
Maturity	:	215-220 days
Grain Type	:	Owl's head
Biotic Stress	:	Moderate resistant to wilt, Ascochyta blight & pod borer
Abiotic Stress	:	Tolerant to cold
Recommended regions	:	NW Himalayan region
Areas of adoption	:	Plains and hills of valley at altitude of 1850 m amsl.
Special attributes	:	Good cooking quality & protein content is 25.0%
Average yield	:	13-14 Q/ha
Seed Rate	:	100 kg/ha
Recommended Fertilizer Dosage	:	N:P:K @ 30:70:40
Precautions to be followed	:	For higher yield of seed crop, adequate plant population, good soil moisture and weed free crop is essential
Principal Breeder	:	Dr. S A Dar
Level of Adoption	:	5%
