

Name : Shalimar Pea-1 (Matter)

Notification No : 268(E) dated: 28-01-15

Parentage	:	KFPD-8
Breeding Methodology adopted	:	Selection
Maturity	:	210-215 days
Grain Type	:	Dimpled
Biotic Stress	:	Resistant to leaf miner, Powdery mildew & Moderate resistant to rust, pod borer & white grub
Abiotic Stress	:	Tolerant to cold
Recommended regions	:	NW Himalayan region
Areas of adoption	:	Plains and hills of valley at altitude of 1850 m amsl.
Special attributes	:	Quality of seed is good & protein content is 21.65%
Average yield	:	12-14 Q/ha
Seed Rate	:	60 -70 (70kg/ha under late sown)
Recommended Fertilizer Dosage	:	N:P:K @ 45:70:40
Precautions to be followed	:	For higher yield of seed crop, adequate plant population, good soil moisture and weed free crop is essential
Principal Breeder	:	Dr. S A Dar
Level of Adoption	:	10%
